

## Singapore Space Challenge 2009

27 June 2009

Mr Mah How Teck, Vice President of Market Development, ST Electronics (Satcom & Sensor Systems) together with Guest of Honour, Prof Lui Pao Chuen, Honorary Advisor of SSTA, and Mr Jonathan Hung, President and Founder of SSTA at STEE-SatComS' booth

ST Electronics (Satcom & Sensor Systems) was a Bronze Sponsor for the Singapore Space Challenge 2009. Space technology has applications in many industries including communications, oil and gas, defence, transport and logistics. Through the Singapore Space Challenge, its organiser Singapore Space & Technology Association (SSTA) aims to create greater awareness for the application of space technology in everyday life.

This year's Challenge highlighted how space technology is critical in supporting marine operations and security. The Challenge, opened to participation by tertiary students, required the teams to design a satellite or system of satellites

## Customer appreciation night

18 June 2009

During the week that CommunicAsia 2009 was held in Singapore, ST Electronics (Satcom & Sensor Systems) organised a get-together with its customers at the Laguna National Golf & Country Club.

Mr Tang Kum Chuen, President of the company, kicked off festivities with a welcome address, expressing the company's appreciation for its customers' trust and strong support over the years. Mr Tang also updated everyone on some of the latest developments and activities such as the showcase of Mobile Earth Station and Ultra Slim Ku-Band at the CommunicAsia 2009 booth. The guests were also informed of the upcoming move into a new office building by mid-July 2009.

Everyone enjoyed the international buffet dinner, which was accompanied by light entertainment

for launch into low Earth orbit to monitor the seaways around Singapore and its neighbouring countries. The team from NUS High School for Mathematics and Science eventually emerged as the winner for this year's competition.

At the Prize Presentation Ceremony held on 27 June 2009, ST Electronics exhibited its range of satellite communication products and solutions at the Science Centre Singapore. Professor Lui Pao Chuen, Honorary Advisor of SSTA, graced the event as the Guest-of-Honor.

Caricature at work

provided by a caricaturist and some walked away with prizes won from the lucky draw. Guests were tickled by the funny caricatures, contributing to a fun-filled and relaxing evening for all.

## Musical hit and movie day with customers

18 July and 12 September 2009

ST Electronics (Info-Comm Systems) invited its customers to the latest Singapore musical comedy *Own Time Own Target*, which was staged at the Drama Centre Theatre on 18 July 2009. ST Electronics had embarked on a fundraising drive for The Straits Times School Pocket Money Fund and this event was in line with the company's support for the charity.

The musical comedy lifts the lid on National Service and provides great entertainment to our customers. Through its fundraising efforts, ST Electronics continues to contribute to the society by alleviating the financial burden faced by parents in providing for their children's education.

On a separate occasion on 12 September at the Cathay Cineplex, customers and their families were invited to a private movie screening of *G-FORCE*, the first 3D movie by renowned producer Jerry Bruckheimer, a comedy adventure specially chosen to suit an audience of all ages.
